PREFACE.

Mount Pleasant,
Roxbury, Mass., March 7, 1879.

The coins and medals here catalogued were collected by Mr. William H. Bowdoin, late of Springfield, Mass. At his decease they fell to his heirs at law, — four in number, — who being unacquainted with Numismatics, and having only a general impression as to the great value of the collection, proceeded without advice or assistance to divide it into four parcels, of which each took one.

This unique method of division resulted in separating series and in breaking up whatever of continuity the cabinet at first possessed; hence the breaks and irregularities noticeable in some of the proof sets and elsewhere, — this sale being made up of two of the four shares referred to, obtained at widely different points.

In addition to the Numismatic department an examination of the catalogue will show that it comprises a very full and fine set of United States Fractional Cur-

rency,— the most complete of any yet offered; also an extensive and varied assortment of relics of the Stone Age, and of the Mound Builders; Continental, and Confederate Money; Coin Catalogues, Books, and Pamphlets; Old Furniture, &c., with many other articles worthy of notice, for all of which the compiler desires to bespeak careful attention and liberal bids.

W. ELLIOT WOODWARD.

COINS OF CHINA.

NOTE.—The six following pieces comprise a very fine set of the Token Coinage of China, issued by the present government about 1853. Our pig-tail brethren on the opposite side, did not take a fancy to this sort of *Cash*, refusing it in business transactions, so that it never got into general use, and is now very rare. The pieces are blemished by a small extra hole through each; the gentleman who formerly owned them kept his cabinet by screwing each piece to a board, the arrangement of his coins being much on the plan adopted by the Pioneer Association of California.

1850 1714 Gloucester Token.

This piece is from the Clay Collection, and I am indebted to the Clay Catalogue, by Mr. Strobridge, for the following excellent description and remarks: Obv. Banking house, "Gloucester (Co Virginia) XII." Rev. Linked triangle "(Rich'd.) Dawson Anno Dom (1714)." The impression unequal, a part only legible. The part in brackets supplied from a memorandum in the possession of J. N. T. Levick, who obtained it from Mr. Mickley, to whom a similar piece was sent from England. The cost of Mr. Mickley's piece was $50. His was imperfect; Mr. Levick says in about the same condition as the present. The piece is not as poor as the above would indicate, parts being very fine. In fine brass. It is quite obvious from such evidence as these pieces themselves furnish, that they were patterns for a shilling coin. Chalmers of Annapolis may have taken a hint from a stray copy extant in his time (seventy years later.)
